ABSTRACTED-PUB-NO: AU 9474438A

BASIC-ABSTRACT:

The wheelchair transport vehicle provides access from the rear of the vehicle. The access opening is closed by a tailgate hinged on the roof line of the vehicle and a foldable ramp attached to the floor of the rear portion of the vehicle.

The floor area for the wheelchair is at a lower level than the floor area of the remainder of the vehicle. The roof line of the vehicle over the lowered floor area is raised above the roof line of the remainder of the vehicle.

ADVANTAGE - Simple modification to passenger vehicle. Wheel chair and occupant can enter in direction of travel of vehicle. Access is provided without interfering with position of normal seats of vehicle, and without restricting number of passengers which can be carried by vehicle.
